generated above when inverted is about 30 cents wider than the
perfect fifth generated by the harmonic series.

Dissonant intervals are those that cause tension and desire to be resolved to

It is possible to have doubly diminished and doubly augmented
intervals, but these are quite rare, as they occur only in
chromatic contexts. As a consequence, any interval has the
same interval number as the corresponding natural interval,
formed by the same notes The Perfect Third accidentals.

The key to understanding consonance and dissonance lies in understanding the
