Her recent research interests are mainly focused on multimodal interaction, user-centered design, adaptive systems to support learning, and evaluation methodology of advanced interfaces and systems. Simple, well designed interfaces tested with print-impaired users. Several commenters recommended treating alterations differently than new construction, arguing for a one-year effective date for alterations.

Accordingly, having an expert to use the tool and interpret the results would be helpful. Generally, the more limiting the disability, the more expensive the adaptation needed for the vehicle. Symplur – Connecting the dots in healthcare social media.

He also worked for Serono in multiple Sales and Marketing positions. Zotero – also taught Electronics and Electrical Engineering in a high school in Bolzano. Worth remembering here is that both the content, and the reading system used to present the content, need to be accessible.
